

### **S.V. Manakov about V.E. Zakharov.**

Sergey Manakov was one of the most brilliant pupils of Zakharov. Manakov always appreciated the good results of the colleagues, but rarely expressed his positive opinion publically.

Once in the year 2000+ we were in his apartment in Chernogolovka and discussed different things. Suddenly he asked me: " Did you read the last paper of Zakharov on the shallow water problem?". I answered: " Not yet". " So, do it", – he said and then added: "Zakharov – genius."
